Summary

Frontend Software Engineer with hands-on experience building full-stack, production-deployed web applications using **React**, **TypeScript**, and **Next.js**. Skilled in REST API integration, component-driven architecture, state management, and responsive UI/UX. Passionate about clean, maintainable code and continuous improvement in agile environments.

Technical Skills

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React, Next.js 14, Redux Toolkit, React Router, Vite, Tailwind CSS

Backend & DB: Node.js, Express.js, PostgreSQL, Prisma ORM, Supabase, REST APIs

Auth: JWT, bcrypt, RBAC

Tools: Git, GitHub, Figma, Docker, Vercel, Netlify, Render

Practices: Responsive Design, UI/UX, Component-Driven Development, Agile/Scrum

Soft Skills

Teamwork & Collaboration · Problem Solving
Clear Communication · Adaptability
Self-Discipline · Time Management

Languages

Greek — Native English — Fluent (C2)
German — Basic

Personal Info

Nationality: Greek Military Service: Fulfilled
Date of Birth: 17 June 1996

Work Experience

Guitar Instructor (Part-Time)

Self-Employed | 2019 – Present

- Designed personalized, curriculum-based lessons, building mentoring, communication, and organizational skills.
- Managed scheduling and student retention independently, demonstrating strong client-facing and organizational ability.

Projects

- SaaS Dashboard — Authentication & CRUD**
Full-stack SaaS application with a **React (Vite)** frontend and a **Node.js/Express** REST API backend. Implemented secure user registration and login using **JWT authentication** and **bcrypt** password hashing, with full **CRUD operations** on a **PostgreSQL** database managed via **Prisma ORM** and hosted on **Supabase**. Designed and enforced **Role-Based Access Control (RBAC)** separating Admin and User permissions. Deployed frontend on **Netlify** and backend on **Render**.
[Live Demo](#) [GitHub](#)
- AI Code Review Assistant**
Full-stack AI-powered tool built with **Next.js 14 (App Router)**, **React**, and **TypeScript**, integrating the **Google Gemini 2.5 API** for instant, context-aware code analysis. Supports multiple review modes — security, performance, readability, and testing — across 10 programming languages. Features a personal workspace for saving and revisiting past reviews, **PDF report export** via jsPDF, and real-time API token usage tracking. Deployed on **Vercel**.
[Live Demo](#) [GitHub](#)
- Amazon Clone — E-Commerce SPA**
Feature-rich single-page e-commerce application built with **React**, **TypeScript**, **Tailwind CSS**, and **Redux Toolkit** for global state management. Implemented real-time product search using state lifting, **dynamic routing** with React Router, and a fully functional shopping cart with per-item quantity controls and a live order summary. Consumed the **Fake Store REST API** for live product data. Deployed on **Vercel**.
[Live Demo](#) [GitHub](#)
- Movie Selector App — React + Vite** application consuming a public movie database REST API, enabling users to browse, search, and manage a personal favorites list with add/remove functionality and persistent UI state.
- Browser Extension Manager** — Vanilla **JavaScript** interactive dashboard for toggling and managing browser extensions, demonstrating DOM manipulation, event-driven programming, and clean UI state handling.

Education

Meta Front-End Developer Professional Certificate

Coursera | Completed August 2025 [Certificate](#)

- 9-course program covering HTML, CSS, JavaScript, React, responsive design, and frontend best practices.

University of West Attica

Department of Informatics & Computer Engineering

Integrated B.Sc./M.Sc. in Software Engineering — In Progress

(5-year integrated degree programme awarding both B.Sc. and M.Sc. upon completion; 9 courses remaining)
